Corporate purpose and business model

1firstcoin LLC operates one of the fastest, safest and most innovative trading sites for cryptocurrencies. We operate as a licensed financial service provider. It has long stopped being a secret that Blockchain, with its diverse applications, is about to sustainably change our global interaction and that it already has changed it in many areas.

1firstcoin makes the difference

Everyone who deals-, trade and work with cryptocurrencies knows the problem:

- To get the best price for your cryptocurrency, either blindly trust your broker, or you make the effort and keep an account on many exchanges
- In most cases, transfer between accounts is necessary to get the best price. Such a transfer also costs extra money

1firstcoin solves the entire problem with his algorithm. By connecting and implementing the order books of leading crypto exchanges, the customer of 1firstcoin LLC always receives the best price for their cryptocurrencies. Leading crypto currency exchangers use our algorithmic application and we share half the revenue from fees with our partners.

Note at all: All profits of 1firstcoin LLC are distributed to the owners of the FST token two times a year. For this purpose, special repurchase programs are being developed above the market value.

The 1first token, (short FST)

- 100,000,000 Token total (max supply)
- 40,000,000 Token (outstanding supply)
- 60,000,000 Token (Investor first an second capital round)
- ERC 20 Standard on Ethereum Blockchain
- CMC (Coimmarketcap.com) listed <https://coinmarketcap.com/currencies/1firstcoin/>
- Coingecko.com listed
- Listed on several exchanges

The 1first token is not an empty promise or a bad bet on the future. The FST token is secured and backed by the value of the company, because all profits will be distributed to the owners of FST token to almost 100%. The token is more or less like an hybrid token, utility and security. There is no comparable investment with such big impulses and opportunities. The FST token is a perfect portfolio addition. Our FST token has been able to generate more than 220% return on invest since its launch in march 2019.

Due to the possibilities given to us with the financial license, we will develop, control and launch further products for the crypto finance world. One project is already at a very advanced stage. The project is called "1irstgold.com", based on our name and the project is 100% owned by 1irstcoin LLC and will continue to be operated by ourself. GOLD has been successfully listed on VinDAX.com and on the P2PB2B.io crypto currency exchange for a few weeks now. GOLD runs with more than \$ 4 million in daily trading volume only on the VinDAX.com crypto exchange. An incredible success.

Advantages of 1irstgold -GOLD-

1. Value-stable investment based on the Xetra Gold trading value of the Frankfurt Stock Exchange
2. Can be converted 365 days a year, 24 hours a day into countless FIAT and crypto currencies via the crypto currency exchanges P2PB2B and VinDAX. It should be noted that these crypto exchanges belong to the 20 largest in the world and are therefore considered absolutely experienced and safe. There is always sufficient liquidity guaranteed.
3. GOLD Tokens can be exchanged for physical gold at any time from a quantity of 100 pieces. An exchange takes place within 72 hours via DHL, FEDEX or UPS as a value shipments internationally. For larger quantities, service providers such as Brings or Prosegur are used.
4. Theft and risk of loss minimized to zero.

With bestrate.org we experience the new edition of the invention of the wheel. The existing wheel just became a bit rounder. The bestrate.org applications will turn the business world upside down. In the future you will not need any banks or other payment service providers.

Imagine this: David runs a sneaker store in Berlin. So far, his customers come and pay in cash or with the familiar means of payment such as credit cards. Usually David waits about 2 weeks for the credit of his payment settlement provider. In addition, he pays about 3% on average to settlement fees. With the bestrate application, which he can simply and easily save on a device of his choice, he can accept almost all current cryptocurrencies, as well as dollars and euros from his customers. The advantages are obvious, because he has in seconds his target currency in the account. This will revolutionize the business world by giving business owners a completely new independence from banks and payment service providers. In addition, David is now reaching a huge audience globally, as it benefits from our community where it can offer, as well as the variety of payment options. David himself does not have to be a cryptocurrency friend, because he can freely choose his target currency.

We are excited about the venture with bestrate.org and we will do our utmost to make it a global success, because this system is definitely unique.

Closing words

With 1irstcoin we want to close a gap in the crypto currency market. There are already many stock exchanges that are doing a good job, but there is no place that unites these good jobs. That's why we look a bit like google for the crypto industry. On the contrary, we do not bother anyone, on the contrary, the stock markets profit through us, just as the traders advertise on google. On top of that, we give our clients a clear arbitrage advantage, which otherwise was reserved only for professionals. Whether as a customer of our crypto currency exchange, or as the owner of our token, with us you are setting the future. Nobody will doubt that sooner or later cash and the associated fiat currencies will disappear from the planet. Just like the dinosaurs, only faster. The blockchain makes everything more transparent, safer and faster and we are a part of it.

Thank you for your attention,

Peter Sommer
